Single-use biopsy probes

With Sedan side-cutting window

EFFICIENT BIOPSIES

The biopsy probes are designed to collect multiple tissue samples along a single trajectory from one or more target points. Each probe has a concentric inner and outer tube for precision and reliability.

Closed window

Ensures safe insertion and removal of the probe from brain tissue

Open window

Enables targeted aspiration and collection of brain tissue

PRECISE TARGETING

The target point is located at the centre of the side-cutting window, enabling accurate and controlled tissue sampling.

Window length

Centre of side-cutting window

Sterile depth stop included with every probe – ready for use when needed

Working length

Outer diameter

Luer-Lock connector

FLEXIBILITY

inomed offers a broad selection of biopsy probes available in two working lengths, two window lengths and two outer diameters, providing versatile options for a variety of clinical requirements.

Working length 190 mm

Article No.	Window length [mm]	Outer diameter [mm]	Colour
805610	5	2.1	
805611	8	2.1	
805612	5	2.5	
805613	8	2.5	

Working length 280 mm

Article No.	Window length [mm]	Outer diameter [mm]	Colour
805620	5	2.1	
805621	8	2.1	
805622	5	2.5	
805623	8	2.5
